

IT'S TIME TO **BLAST OFF** ON A CLASSROOM ADVENTURE!

What is your class question?

Tap into your pupils' natural curiosity – what did they ask you today? Get your class to come up with a question that's linked to a specific curricular area or from common themes that may interest them like wellbeing, the environment, food, health and living things. Often the simplest questions are the best!

Submit your class question

Go to esbscienceblast.com for more ideas and tips. Submit your question any time before February 26th 2021 to be paired with a STEM expert / "judge".

Investigate it

There are simple methods you can use to explore even the most adventurous questions! You can find investigation tools, videos and lesson plans on our website to help you. You can also join our Facebook community for support and ideas from other teachers.

Tell us about it

How did your investigation go? What did you learn? Your class can share their findings with your STEM expert / "judge" who will offer positive feedback, build their confidence and have them beaming with pride.

And did we mention **ESB Science Blast TV**? In April 2021 we will be showcasing lots of class project work from around the country!

"Our fifth-class pupils realised that science is all around them in everyday life and not just the remit of the white coated scientist in the lab."

– Eleanor Fahy, Mother of Divine Grace School, Dublin 11
